A self-motivated and detail-oriented Full Stack Developer with hands-on experience in building responsive web applications. Seeking an internship or entry level position to further develop skills in both front-end and back-end technologies while contributing and adding value to innovative projects in an organization.

## Experience

### Freelance Web Designer

2024

- Developed and maintained multiple responsive web applications using React, CSS, JavaScript, and Bootstrap, enhancing user experience and accessibility.
- Built a React-based E-commerce platform with shopping cart functionality, dynamic product filtering, and state management using Redux.
- Integrated Framer Motion and GSAP for smooth, visually appealing animations, improving the interactivity of web pages.
- Implemented a gym management system using React without a backend, following an ERD-based structure to manage entities like members, coaches, and gym sessions.
- Designed a portfolio website using React and Next.js with modern styling techniques, server-side rendering, and deployed it to a hosting platform.
- Collaborated with designers and used Tailwind CSS for sleek, professional UI components in projects like product cards and shopping cart systems.
- Utilized Postman for API testing and integration, ensuring seamless communication between the client and server.
- Worked with version control tools like Git, ensuring clean and trackable code during project development.

## Education

### Yaba College Of Technology

- HND in Computer Science,

### Yaba College Of Technology

- ND in Computer Science,

### Nigerian Railway Technical Institute

- Diploma in Computer Technician

### GomyCode

- Certification in Web Development

## Skills

- Github-Postman-Git-Slack-Teams
- HTML 5, CSS3(Bootstrap, Tailwind CSS)
- JavaScript (ES6), RESTful APIs
- React.js, Node.js, Express.js, MongoDB
- JWT, bcrypt
- Computer Repair
- Time Management, Adaptability
- Creative Thinking, Collaboration

# Projects

## E-Commerce Platform

Tech Stack: React, Redux, Bootstrap, Node.js, MongoDB, Express

- Developed a full-featured e-commerce application, including product listings, filtering, shopping cart, and checkout functionality.
- Implemented state management with Redux to efficiently handle global states like cart items and user authentication.
- Integrated RESTful APIs for product data, user management, and order processing.
- Styled the UI using Bootstrap and Tailwind CSS to ensure a responsive and visually appealing layout.

## Portfolio Website

Tech Stack: React, Next.js, CSS, Framer Motion

- Created a personal portfolio website to showcase projects and skills, using Next.js for server-side rendering and optimized performance.
- Added interactive animations with Framer Motion to enhance user engagement.
- Integrated a dynamic project gallery, contact form, and responsive navigation bar for a seamless user experience.

## To-Do List Application

Tech Stack: React, Redux

- Built a to-do list application with features for adding, editing, deleting, and marking tasks as completed.
- Implemented form validation and persisted data using browser local storage.
- Used Redux for managing global state, allowing users to filter tasks by completion status.
